# POSTUROLOGY SYSTEM

complex for evaluation of posture status

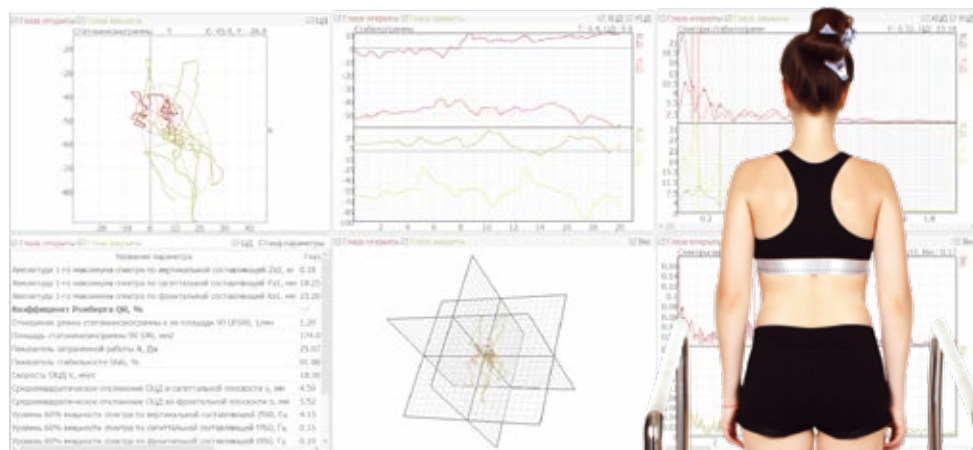

Posturology Complex is the objective comprehensive assessment of postural status, locomotion system, symmetry of muscular tone and balance functions

Stabilometry  
3D Scanner  
Biomechanics

## POSTUROLOGY SYSTEM

### BALANCE SYSTEM

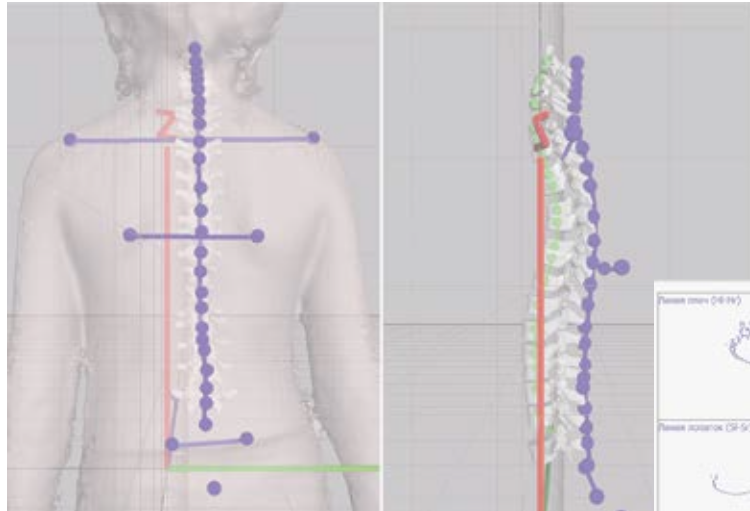

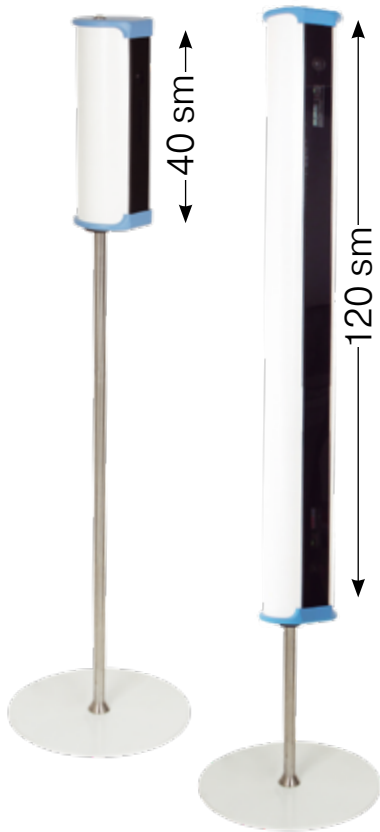

**Stabilometry study allows to evaluate:**

- balance
- patient coordination capabilities
- dysfunction of proprioceptive, vestibular and visual analyzers

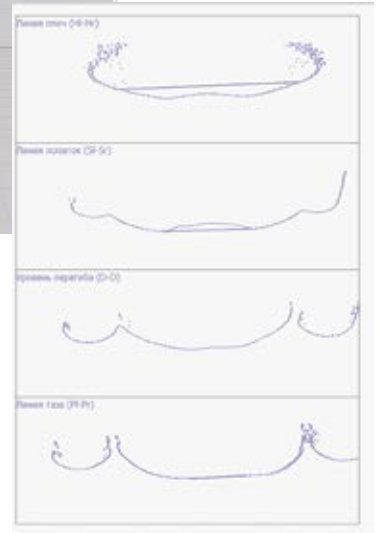

## 3D SCANNER

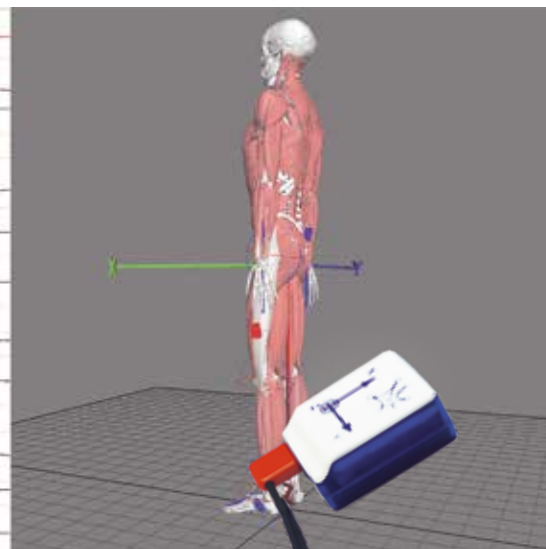

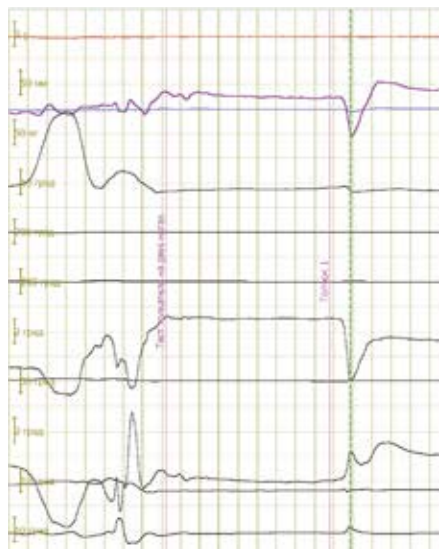

### 3D scanning methods allows:

- 3D anthropometry
- diagnosis of posture disorders, spinal curvature, foot deformity. Limbs asymmetry detection

# POSTUROLOGY SYSTEM

## BIOMECHANICAL SENSORS

### Carring out of functional tests:

- joint mobility assessment
- registration of muscle tone (EMG)
- registration of individual body segments tremor

Neurocor LLC  
develops  
and manufactures  
equipment  
for medical  
rehabilitation  
and diagnostics  
uses in health  
care and sports.  
We are open  
for cooperation  
and always glad  
to welcome partners  
and associates
