

BIOKINEKT

Neurocor
trust motion

3D SCANNER

Device for building a 3D model of the human body

Neurocor

Optical scanner for 3D analysis of the spine, lower limbs and anthropometric measurements

3D SCANNER BIOKINEKT

3D SCANNER «BIOKINEKT» OBJECTIVITY WITHOUT RADIATION EXPOSURE

Quick diagnosis:

- posture disorders
- spinal curvature
- chest distortion
- foot deformity

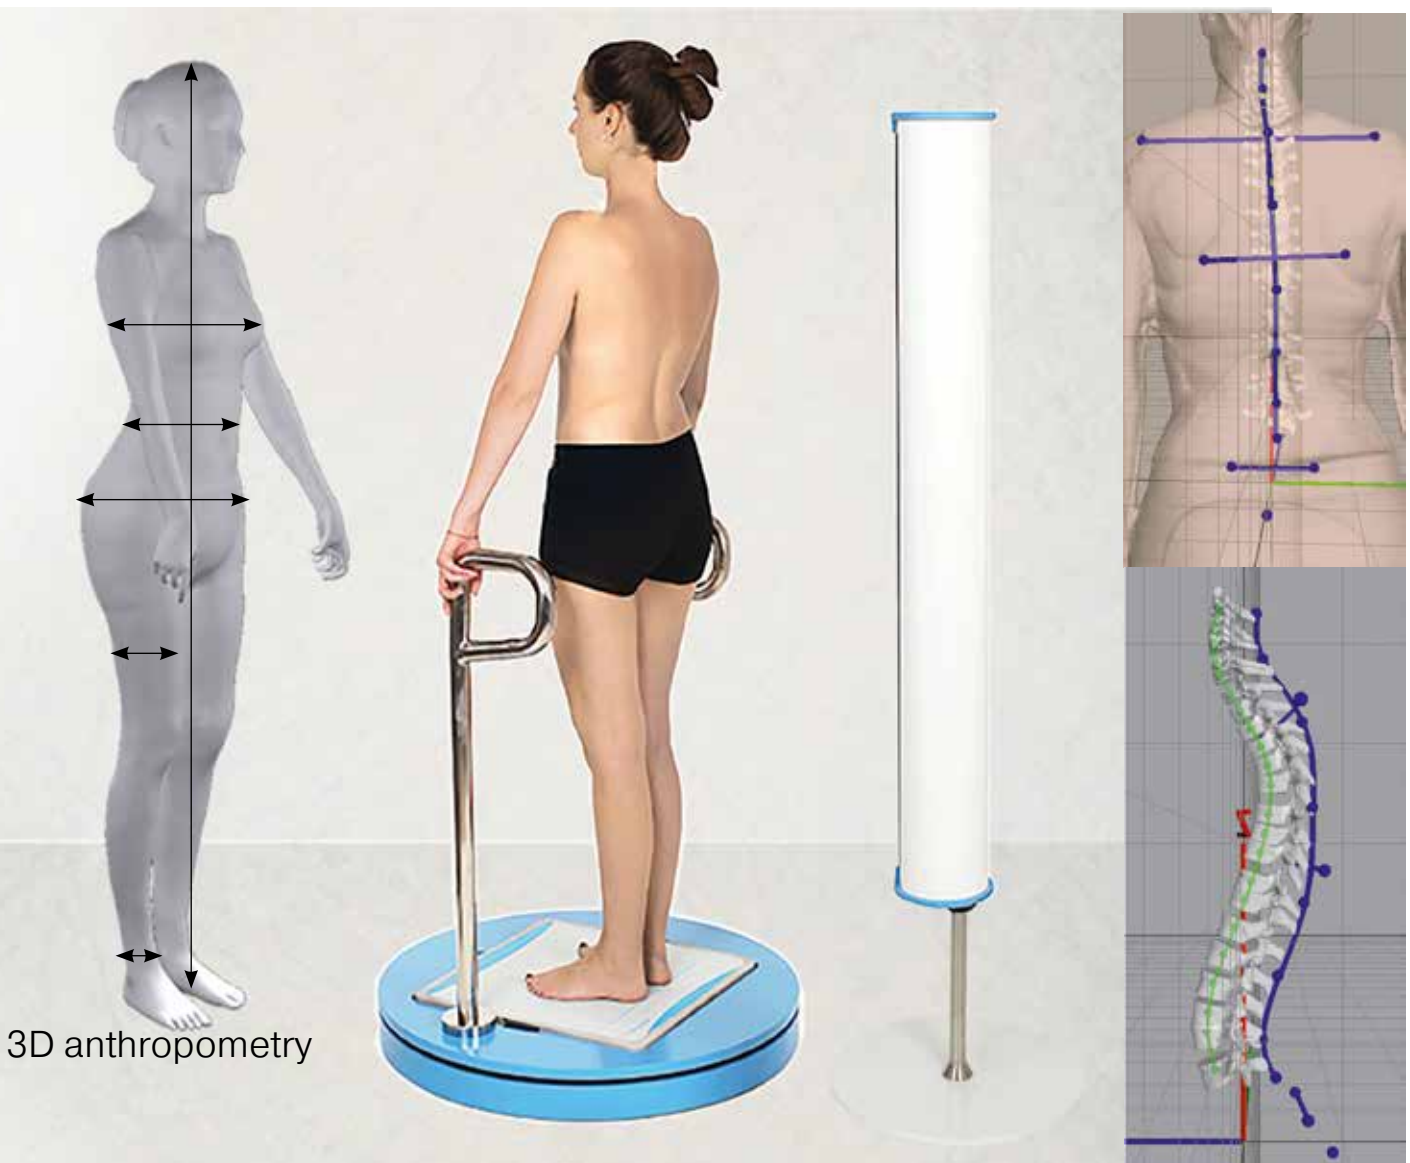

3D SCANNER BIOKINEKT

ADVANTAGES OF 3D SCANNER

affordable price
safety method
objectivity of results
ease of research
visual display of results on 3D model
possibility of examination in functional positions

EMG muscle tone evaluation
calculation of the body segments twisting angles, deviation from the Vertical Barre
registration of biomechanics of movements (flexion-extension of the spinal column)
measurement of anthropometric parameters
creating of personalized techniques

Neurocor LLC
develops
and manufactures
equipment
for medical
rehabilitation
and diagnostics
uses in health
care and sports.
We are open
for cooperation
and always glad
to welcome partners
and associates.
