BODY WEIGHT SUPPORT SYSTEM «BIOKINEKT»

Patient's body weight support system for facilitation of walking and falling prevention during rehabilitation

APPLICATION:

- Verticalization
- support of balance in a standing posture
- compensation of the person's load (weight)
- degree control of weight unloading
- degree control of load on the spine

ADVANTAGES:

- Autonomous battery system
- Unloading weight sensor
- Built-in overload protection
- Biomechanical sensor «Biokinekt»:
 - registration of deviation angles
 - registration of linear accelerations
 - evaluation of spine depreciation properties

It is possible to use the system as a separate module, or a part of medical complexes, with various training devices
